

Managing Students with Seizures ECHO

The Importance of School Nurses

What is Managing Students with Seizures ECHO?

The Managing Students with Seizures ECHO is an interactive forum for school nurses to:

- Increase knowledge and self-confidence around managing students with seizures.
- Increase communication between school nurses, other school personnel and parents to improve care coordination of students with seizures.
- Learn best practices to create a safe and supportive school environment for students with seizures.
- Gain access to resources to support the care of students with seizures.

ECHO Model

This program uses the ECHO (Extension for Community Healthcare Outcomes) model™, a virtual telementoring platform designed to create communities of learners by bringing together health care providers and experts in topical areas using didactic and case-based presentations, fostering an “ALL TEACH, ALL LEARN” approach. Using basic, widely available video conferencing technology, clinical management tools, and case-based learning, health care providers develop knowledge and self-efficacy on conditions and/or processes. Participants will meet regularly for ten sessions. All attendees are strongly encouraged to actively participate during each virtual ECHO sessions. Technical assistance will be provided prior and throughout the launch of the program.

Eligible Participants

School nurses are eligible to participate on the virtual learning network. School nurses are strongly encouraged to invite other school personnel to join as applicable.

Registration

Participants are encouraged to attend on a regular basis and will receive a certificate of completion, which can be submitted to respective accreditation bodies.
