

# Seizures and Epilepsy In Older Adults

WEBINAR Series: Accessible online learning from the Epilepsy Foundation

Each year, more than 50,000 new cases of epilepsy occur in people over 60 years of age.

**Epilepsy** affects more than 3.4 million individuals in the US, including close to 1 million older adults (age 55+).

The Epilepsy Foundation has created three online learning modules to train professionals caring for older adults with epilepsy. Please join us to learn about:

**Module 1 • Seizure Identification and Epilepsy Basics**

Thursday, April 23, 2020, 4:00 - 5:00 pm EST

Registration link: [bit.ly/EpilepsyOA1](https://bit.ly/EpilepsyOA1)

**Module 2 • Epilepsy: Treatment Considerations in Older Adults**

Thursday, May 7, 2020, 4:00 - 5:00 pm EST

Registration link: [bit.ly/EpilepsyOA2](https://bit.ly/EpilepsyOA2)

**Module 3 • Epilepsy: Impact and Risks in Older Adults**

Thursday, May 28, 2020, 4:00 - 5:00 pm EST

Registration link: [bit.ly/EpilepsyOA3](https://bit.ly/EpilepsyOA3)
